

Is your BC plan missing anything?

You don't want to wait till an event happens to discover there's a hole in your BC plan. Learn how to develop, evaluate and thoroughly test your plan ahead of time with help from the *Business Continuity from A to Z* webinar and white papers series.

The free, five-part series is presented by an expert in the field of business continuity planning, Greg Livingston. Join in and get the latest information on effective planning tools, ways to test your plan, tips on keeping your plan up-to-date and preparing for an audit.

Best of all, the webinar series is modular, allowing you to focus on just the topics that are most important to you. Each webinar is accompanied by a complementary white paper with additional information.

Part 1 – Contingencies: Does your plan cover all bases?

Find out everything you need to build your own BC plan, from regulations and risk to getting executive buy-in and choosing who should be on your planning team.

Part 2 – Business Impact Analysis: The all-important foundation

A business impact analysis shows where your organization is at greatest risk. It's an important step in developing your plan and an invaluable tool for BC/DR.

Part 3 – Think it Through: Strategy, development and documentation

Developing strategies that are effective and meet a tight budget is more important than ever; this webinar will help you focus your efforts and resources to achieve success.

Part 4 – Your BC Toolkit: Options and integration

Learn what tools are needed to develop your BC plan, understand the pros and cons of each and decide which will work best for your organization.

Part 5 – The Final Countdown: Rollout, testing, and results

Find out what an auditor is likely to request and be prepared with the answers ahead of time and, most importantly, test your plan before an actual emergency does it for you.

Use the webinar and white paper series to make sure that your BC plan has no holes in it.
